Photo Error Resolution: Please make sure all photos are taken and of adequate quality before leaving the interview.

The best procedure is to take the photos in order: Individual, Group, Area, then Signature Agreement. Do not delete any photos after the "Signature Agreement" photo has been taken.

When a photo is deleted after the "Signature Agreement" photo has been taken, you may see the following change in your screen.

If this happens, delete the "Signature Agreement" photo and retake it. This should fix the error. If not, delete all the photos and begin again.

Again, do not delete any photos after the "Signature Agreement" photo has been recaptured.
